## Contents

Preface ........................................................................................................... xxi

1 Introduction 1

What Is International Economics About? ....................................................... 3
  The Gains from Trade ............................................................................... 4
  The Pattern of Trade ............................................................................... 5
  How Much Trade? .................................................................................. 5
  Balance of Payments ............................................................................. 6
  Exchange Rate Determination ................................................................ 6
  International Policy Coordination ............................................................ 7
  The International Capital Market ............................................................... 7

International Economics: Trade and Money ................................................ 8

Part 1 International Trade Theory 10

2 World Trade: An Overview 10

  Who Trades with Whom? ....................................................................... 10
  Size Matters: The Gravity Model ............................................................. 11
  Using the Gravity Model: Looking for Anomalies ..................................... 13
  Impediments to Trade: Distance, Barriers, and Borders .......................... 14
  The Changing Pattern of World Trade ..................................................... 16
  Has the World Gotten Smaller? ................................................................. 16
  What Do We Trade? ............................................................................... 17
  Service Outsourcing .............................................................................. 19
  Do Old Rules Still Apply? ....................................................................... 21
  Summary ................................................................................................ 21

3 Labor Productivity and Comparative Advantage: The Ricardian Model 24

  The Concept of Comparative Advantage ................................................. 25
  A One-Factor Economy ........................................................................... 26
    Production Possibilities ........................................................................ 27
    Relative Prices and Supply ................................................................... 28
  Trade in a One-Factor World ................................................................. 29
    Determining the Relative Price After Trade .......................................... 30
  BOX: Comparative Advantage in Practice: The Case of Babe Ruth ........ 33
    The Gains from Trade ........................................................................ 34
    A Note on Relative Wages ................................................................... 35
  BOX: The Losses from Nontrade ............................................................. 36
  Misconceptions About Comparative Advantage .................................... 37
    Productivity and Competitiveness ......................................................... 37
    The Pauper Labor Argument ................................................................ 37
  BOX: Do Wages Reflect Productivity? ..................................................... 38
    Exploitation ......................................................................................... 39
  Comparative Advantage with Many Goods .......................................... 40
    Setting Up the Model ........................................................................... 40
    Relative Wages and Specialization ....................................................... 40
    Determining the Relative Wage in the Multigood Model ......................... 42
4 Specific Factors and Income Distribution

The Specific Factors Model .................................................51
BOX: What Is a Specific Factor? ...........................................52
  Assumptions of the Model .............................................52
  Production Possibilities ..............................................53
  Prices, Wages, and Labor Allocation ...............................56
  Relative Prices and the Distribution of Income .................60
International Trade in the Specific Factors Model ...............62
Income Distribution and the Gains from Trade ....................63
The Political Economy of Trade: A Preliminary View ..........65
CASE STUDY: Trade and Unemployment ............................66
  Income Distribution and Trade Politics ..........................68
International Labor Mobility ...........................................69
CASE STUDY: Wage Convergence in the Age of Mass Migration .70
CASE STUDY: Immigration and the U.S. Economy ...............71
Summary ..........................................................................73
Appendix: Further Details on Specific Factors .....................77
  Marginal and Total Product ..........................................77
  Relative Prices and the Distribution of Income .................78

5 Resources and Trade: The Heckscher-Ohlin Model

A Model of a Two-Factor Economy .....................................81
  Prices and Production .................................................81
  Choosing the Mix of Inputs .........................................84
  Factor Prices and Goods Prices ...................................86
  Resources and Output .................................................88
Effects of International Trade Between Two-Factor Economies .89
  Relative Prices and the Pattern of Trade .......................90
  Trade and the Distribution of Income ............................91
CASE STUDY: North-South Trade and Income Inequality ..........92
  Factor-Price Equalization ...........................................97
Empirical Evidence on the Heckscher-Ohlin Model ...............98
  Trade in Goods as a Substitute for Trade in Factors ...........98
  Patterns of Exports Between Developed and Developing Countries .101
  Implications of the Tests ...........................................102
Summary .........................................................................104
Appendix: Factor Prices, Goods Prices, and Production Decisions 107
  Choice of Technique ..................................................107
  Goods Prices and Factor Prices ...................................108
  More on Resources and Output .....................................109

6 The Standard Trade Model

A Standard Model of a Trading Economy ..........................112
  Production Possibilities and Relative Supply ...................112
  Relative Prices and Demand ........................................113
  The Welfare Effect of Changes in the Terms of Trade .........116
  Determining Relative Prices .........................................117
  Economic Growth: A Shift of the RS curve .......................117
7 External Economies of Scale and the International Location of Production 137

- Economies of Scale and International Trade: An Overview 138
- Economies of Scale and Market Structure 139

- The Theory of External Economies 140
  - Specialized Suppliers 140
  - Labor Market Pooling 141
  - Knowledge Spillovers 142
  - External Economies and Market Equilibrium 142

- External Economies and International Trade 143
  - External Economies, Output, and Prices 143
  - External Economies and the Pattern of Trade 145

- BOX: Holding the World Together 147
  - Trade and Welfare with External Economies 147
  - Dynamic Increasing Returns 149

- Interregional Trade and Economic Geography 150
- BOX: Tinseltown Economics 151

8 Firms in the Global Economy: Export Decisions, Outsourcing, and Multinational Enterprises 155

- The Theory of Imperfect Competition 156
  - Monopoly: A Brief Review 157
  - Monopolistic Competition 159

- Monopolistic Competition and Trade 164
  - The Effects of Increased Market Size 164
  - Gains from an Integrated Market: A Numerical Example 166
  - The Significance of Intra-Industry Trade 169

- Firm Responses to Trade: Winners, Losers, and Industry Performance 172
  - Performance Differences Across Producers 172
  - The Effects of Increased Market Size 174

- Trade Costs and Export Decisions 176

- Dumping 178

- CASE STUDY: Antidumping as Protectionism 179

- Multinationals and Outsourcing 180
### Part 2: International Trade Policy

#### 9 The Instruments of Trade Policy

- **Basic Tariff Analysis** .................................................. 192
  - Supply, Demand, and Trade in a Single Industry .................. 193
  - Effects of a Tariff ..................................................... 195
  - Measuring the Amount of Protection .................................. 196
- **Costs and Benefits of a Tariff** ..................................... 198
  - Consumer and Producer Surplus ..................................... 198
  - Measuring the Costs and Benefits .................................... 199
- **Box: Tariffs for the Long Haul** .................................... 202
- **Other Instruments of Trade Policy** .................................. 202
  - Export Subsidies: Theory ............................................ 203
- **Case Study: Europe’s Common Agricultural Policy** ............... 204
  - Import Quotas: Theory .............................................. 205
- **Case Study: An Import Quota in Practice: U.S. Sugar** .......... 206
  - Voluntary Export Restraints ....................................... 208
- **Case Study: A Voluntary Export Restraint in Practice: Japanese Autos** .................................................. 208
  - Local Content Requirements ....................................... 209
- **Box: American Buses, Made in Hungary** ............................ 210
  - Other Trade Policy Instruments .................................... 210
- **The Effects of Trade Policy: A Summary** ......................... 211
- **Summary** .................................................................. 211
- **Appendix: Tariffs and Import Quotas in the Presence of Monopoly** .................................................. 215
  - The Model with Free Trade ........................................... 215
  - The Model with a Tariff ............................................... 216
  - The Model with an Import Quota ................................... 217
  - Comparing a Tariff and a Quota .................................... 217

#### 10 The Political Economy of Trade Policy

- **The Case for Free Trade** ............................................... 219
  - Free Trade and Efficiency ........................................... 220
  - Additional Gains from Free Trade ................................... 221
  - Rent-Seeking ................................................................ 222
  - Political Argument for Free Trade .................................. 222
- **Case Study: The Gains from 1992** .................................. 223
- **National Welfare Arguments Against Free Trade** ............... 224
  - The Terms of Trade Argument for a Tariff ......................... 225
  - The Domestic Market Failure Argument Against Free Trade ... 226
  - How Convincing Is the Market Failure Argument? ............... 227
- **Income Distribution and Trade Policy** .............................. 229
  - Electoral Competition .................................................. 229
  - Collective Action .......................................................... 230
- **Box: Politicians for Sale: Evidence from the 1990s** .......... 231
  - Modeling the Political Process ...................................... 232
  - Who Gets Protected? ...................................................... 233
### International Negotiations and Trade Policy

- The Advantages of Negotiation ......................................................... 235
- International Trade Agreements: A Brief History ................................. 236
- The Uruguay Round ............................................................................ 238
- Trade Liberalization ............................................................................ 238
- Administrative Reforms: From the GATT to the WTO ............................. 239
- Benefits and Costs ................................................................................ 240

**BOX:** Settling a Dispute—and Creating One ........................................ 241

**CASE STUDY:** Testing the WTO’s Mettle ........................................... 242

**The Doha Disappointment** .................................................................. 243

**BOX:** Do Agricultural Subsidies Hurt the Third World? ....................... 244

- Preferential Trading Agreements ......................................................... 245

**BOX:** Free Trade Area versus Customs Union .................................... 246

**BOX:** Do Trade Preferences Have Appeal? ......................................... 248

**CASE STUDY:** Trade Diversion in South America ............................... 249

**Summary** .............................................................................................. 250

**Appendix: Proving That the Optimum Tariff Is Positive** ....................... 253

- Demand and Supply ............................................................................. 253
- The Tariff and Prices ............................................................................ 253
- The Tariff and Domestic Welfare .......................................................... 254

### Trade Policy in Developing Countries ................................................ 256

**Import-Substituting Industrialization** ................................................. 257

- The Infant Industry Argument ............................................................. 258
- Promoting Manufacturing Through Protection ...................................... 259

**CASE STUDY:** Mexico Abandons Import-Substituting Industrialization ... 261

**Results of Faving Manufacturing: Problems of Import-Substituting** ......... 262

- Industrialization .................................................................................. 262
- Trade Liberalization Since 1985 ......................................................... 263
- Trade and Growth: Takeoff in Asia ....................................................... 265

**BOX:** India’s Boom ............................................................................. 267

**Summary** .............................................................................................. 268

### Controversies in Trade Policy .............................................................. 271

**Sophisticated Arguments for Activist Trade Policy** ............................... 272

- Technology and Externalities ............................................................... 272
- Imperfect Competition and Strategic Trade Policy ................................. 274

**BOX:** A Warning from Intel’s Founder ............................................... 277

**CASE STUDY:** When the Chips Were Up ........................................... 278

**Globalization and Low-Wage Labor** ................................................... 279

- The Anti-Globalization Movement ....................................................... 280
- Trade and Wages Revisited ................................................................. 280
- Labor Standards and Trade Negotiations ............................................. 282
- Environmental and Cultural Issues ...................................................... 283
- The WTO and National Independence ................................................ 284

**CASE STUDY:** Bare Feet, Hot Metal, and Globalization ....................... 285

**Globalization and the Environment** ...................................................... 286

- Globalization, Growth, and Pollution .................................................... 286
- The Problem of “Pollution Havens” ...................................................... 287
- The Carbon Tariff Dispute .................................................................... 289

**Summary** .............................................................................................. 290
Contents

Part 3 Exchange Rates and Open-Economy Macroeconomics  293

13 National Income Accounting and the Balance of Payments  293

The National Income Accounts ........................................... 295
  National Product and National Income ................................ 296
  Capital Depreciation and International Transfers ....................... 297
  Gross Domestic Product ............................................ 297

National Income Accounting for an Open Economy .................... 298
  Consumption .......................................................... 298
  Investment ........................................................... 298
  Government Purchases ................................................ 299
  The National Income Identity for an Open Economy ................. 299
  An Imaginary Open Economy .......................................... 299
  The Current Account and Foreign Indebtedness ....................... 300
  Saving and the Current Account ..................................... 302
  Private and Government Saving ...................................... 303

CASE STUDY: Government Deficit Reduction May Not Increase the Current Account Surplus ............................................ 304

The Balance of Payments Accounts .................................... 306
  Examples of Paired Transactions ..................................... 307
  The Fundamental Balance of Payments Identity ....................... 308
  The Current Account, Once Again .................................... 309
  The Capital Account .................................................. 310
  The Financial Account ................................................ 310
  Net Errors and Omissions ............................................ 311
  Official Reserve Transactions ........................................ 312

CASE STUDY: The Assets and Liabilities of the World’s Biggest Debtor ............................................ 313

Summary ................................................................. 316

14 Exchange Rates and the Foreign Exchange Market: An Asset Approach  320

Exchange Rates and International Transactions ....................... 321
  Domestic and Foreign Prices ......................................... 321
  Exchange Rates and Relative Prices .................................. 323

The Foreign Exchange Market ......................................... 324
  The Actors ............................................................ 324
  Characteristics of the Market ....................................... 325
  Spot Rates and Forward Rates ...................................... 326
  Foreign Exchange Swaps ............................................. 328
  Futures and Options .................................................. 328

The Demand for Foreign Currency Assets .............................. 328
  Assets and Asset Returns ............................................ 329

BOX: Nondeliverable Forward Exchange Trading in Asia .............. 330
  Risk and Liquidity .................................................... 332
  Interest Rates ......................................................... 332
  Exchange Rates and Asset Returns .................................. 334
  A Simple Rule ......................................................... 334
  Return, Risk, and Liquidity in the Foreign Exchange Market ....... 336

Equilibrium in the Foreign Exchange Market .......................... 337
  Interest Parity: The Basic Equilibrium Condition .................... 337
  How Changes in the Current Exchange Rate Affect Expected Returns ...... 338
  The Equilibrium Exchange Rate ...................................... 339

Interest Rates, Expectations, and Equilibrium ....................... 341
  The Effect of Changing Interest Rates on the Current Exchange Rate ...... 342
  The Effect of Changing Expectations on the Current Exchange Rate ...... 343
Contents

Output and the Exchange Rate in the Short Run 421

Determinants of Aggregate Demand in an Open Economy 422
  Determinants of Consumption Demand 422
  Determinants of the Current Account 423
  How Real Exchange Rate Changes Affect the Current Account 424
  How Disposable Income Changes Affect the Current Account 424

The Equation of Aggregate Demand 425
  The Real Exchange Rate and Aggregate Demand 425
  Real Income and Aggregate Demand 425

How Output Is Determined in the Short Run 426

Output Market Equilibrium in the Short Run: The DD Schedule 428
  Output, the Exchange Rate, and Output Market Equilibrium 428
  Deriving the DD Schedule 429
  Factors That Shift the DD Schedule 429

Asset Market Equilibrium in the Short Run: The AA Schedule 432
  Output, the Exchange Rate, and Asset Market Equilibrium 432
  Deriving the AA Schedule 434
  Factors That Shift the AA Schedule 434

Short-Run Equilibrium for an Open Economy: Putting the DD and AA Schedules Together 435

Temporary Changes in Monetary and Fiscal Policy 437
  Monetary Policy 438
  Fiscal Policy 438
  Policies to Maintain Full Employment 439

Inflation Bias and Other Problems of Policy Formulation 441

Permanent Shifts in Monetary and Fiscal Policy 442
  A Permanent Increase in the Money Supply 442
  Adjustment to a Permanent Increase in the Money Supply 442
  A Permanent Fiscal Expansion 444

Macroeconomic Policies and the Current Account 446

Gradual Trade Flow Adjustment and Current Account Dynamics 447
  The J-Curve 447
  Exchange Rate Pass-Through and Inflation 449

Box: Exchange Rates and the Current Account 450

The Liquidity Trap 451

Summary 454

Appendix: The Fisher Effect, the Interest Rate, and the Exchange Rate
Real Interest Parity 412
International Interest Rate Differences and the Real Exchange Rate 410
Nominal and Real Exchange Rates in Long-Run Equilibrium 408

Beyond Purchasing Power Parity: A General Model of Long-Run PPP in the Short Run and in the Long Run 398

Case Study: Why Price Levels Are Lower in Poorer Countries 401

Some Meaty Evidence on the Law of One Price 398

Sticky Prices and the Law of One Price: Evidence 406

Exchange Rates 403
The Real Exchange Rate 404
Demand, Supply, and the Long-Run Real Exchange Rate 405

Real Interest Parity 412
Nominal and Real Exchange Rates in Long-Run Equilibrium 408

PPP in the Short Run and in the Long Run 398

Case Study: Why Price Levels Are Lower in Poorer Countries 401

Beyond Purchasing Power Parity: A General Model of Long-Run PPP in the Short Run and in the Long Run 398
### Contents

**Appendix 1: Intertemporal Trade and Consumption Demand** ........................................... 458  

### Part 4 International Macroeconomic Policy

#### Fixed Exchange Rates and Foreign Exchange Intervention 463

**Why Study Fixed Exchange Rates?** ........................................................................ 464  
**Central Bank Intervention and the Money Supply** ........................................... 465  
  - The Central Bank Balance Sheet and the Money Supply ........................................ 465  
  - Foreign Exchange Intervention and the Money Supply ...................................... 467  
  - Sterilization ........................................................................................................ 467  
  - The Balance of Payments and the Money Supply .............................................. 468  
**How the Central Bank Fixes the Exchange Rate** .................................................... 469  
  - Foreign Exchange Market Equilibrium Under a Fixed Exchange Rate .............. 469  
  - Money Market Equilibrium Under a Fixed Exchange Rate .............................. 470  
  - A Diagrammatic Analysis ................................................................................... 471  
**Stabilization Policies with a Fixed Exchange Rate** .................................................. 472  
  - Monetary Policy ................................................................................................... 472  
  - Fiscal Policy ......................................................................................................... 473  
  - Changes in the Exchange Rate ........................................................................... 474  
  - Adjustment to Fiscal Policy and Exchange Rate Changes .................................. 476  
**Balance of Payments Crises and Capital Flight** ...................................................... 476  
**Managed Floating and Sterilized Intervention** ......................................................... 479  
  - Perfect Asset Substitutability and the Ineffectiveness of Sterilized Intervention 479  
**BOX: Brazil’s 1998–1999 Balance of Payments Crisis** ........................................ 480  
  - Foreign Exchange Market Equilibrium Under Imperfect Asset Substitutability 481  
  - The Effects of Sterilized Intervention with Imperfect Asset Substitutability 482  
  - Evidence on the Effects of Sterilized Intervention ........................................... 483  
**Reserve Currencies in the World Monetary System** .............................................. 484  
  - The Mechanics of a Reserve Currency Standard ......................................... 485  
  - The Asymmetric Position of the Reserve Center ............................................. 485  
**The Gold Standard** ................................................................................................. 486  
  - The Mechanics of a Gold Standard ................................................................. 486  
  - Symmetric Monetary Adjustment Under a Gold Standard ................................ 487  
  - Benefits and Drawbacks of the Gold Standard .............................................. 487  
  - The Bimetallic Standard .................................................................................... 488  
  - The Gold Exchange Standard ........................................................................... 489  
**CASE STUDY: The Demand for International Reserves** .................................... 489  
**Summary** ................................................................................................................ 493  

#### Appendix 1: Equilibrium in the Foreign Exchange Market  
  - with Imperfect Asset Substitutability ................................................................... 498  
  - Demand ............................................................................................................ 498  
  - Supply ............................................................................................................. 499  
  - Equilibrium ...................................................................................................... 499  

#### Appendix 2: The Timing of Balance of Payments Crises ...................................... 501

### Part 4 International Macroeconomic Policy

#### International Monetary Systems: An Historical Overview 504

**Macroeconomic Policy Goals in an Open Economy** ........................................... 505  
  - Internal Balance: Full Employment and Price Level Stability ......................... 506  
  - External Balance: The Optimal Level of the Current Account ....................... 507  
**Classifying Monetary Systems: The Open-Economy Trilemma** ............................. 509
# Contents

International Macroeconomic Policy Under the Gold Standard, 1870–1914 ........................................ 510
  Origins of the Gold Standard ............................................................... 511
  External Balance Under the Gold Standard ........................................... 511
  The Price-Specie-Flow Mechanism ..................................................... 511
  Internal Balance Under the Gold Standard .......................................... 513

**BOX: Hume versus the Mercantilists** .................................................. 514

**CASE STUDY: The Political Economy of Exchange Rate Regimes:**
  Conflict Over America’s Monetary Standard During the 1890s ..................... 514

The Interwar Years, 1918–1939 .................................................................. 516
  The Fleeting Return to Gold ................................................................. 516
  International Economic Disintegration .................................................... 516

**CASE STUDY: The International Gold Standard and the Great Depression** ...... 517

The Bretton Woods System and the International Monetary Fund ..................... 518
  Goals and Structure of the IMF ............................................................ 519
  Convertibility and the Expansion of Private Financial Flows ....................... 520
  Speculative Capital Flows and Crises ..................................................... 521

**Analyzing Policy Options for Reaching Internal and External Balance** ...... 521
  Maintaining Internal Balance .............................................................. 522
  Maintaining External Balance ............................................................. 523
  Expenditure-Changing and Expenditure-Switching Policies ......................... 523

The External Balance Problem of the United States Under Bretton Woods .......... 525

**CASE STUDY: The End of Bretton Woods, Worldwide Inflation,**
and the Transition to Floating Rates ......................................................... 526

The Mechanics of Imported Inflation ....................................................... 528
  Assessment ...................................................................................... 529

**The Case for Floating Exchange Rates** ............................................... 529
  Monetary Policy Autonomy ................................................................. 530
  Symmetry ....................................................................................... 531
  Exchange Rates as Automatic Stabilizers ............................................... 531
  Exchange Rates and External Balance .................................................. 533

**CASE STUDY: The First Years of Floating Rates, 1973–1990** ..................... 533

Macroeconomic Interdependence Under a Floating Rate ................................ 537

**CASE STUDY: Transformation and Crisis in the World Economy** .............. 538

What Has Been Learned Since 1973? ....................................................... 544
  Monetary Policy Autonomy ................................................................. 544
  Symmetry ....................................................................................... 545
  The Exchange Rate as an Automatic Stabilizer ....................................... 546
  External Balance ............................................................................... 546
  The Problem of Policy Coordination .................................................... 547

Are Fixed Exchange Rates Even an Option for Most Countries? ..................... 547

Summary ............................................................................................. 548

Appendix: International Policy Coordination Failures .................................... 554

# Optimum Currency Areas and the European Experience .............................. 557

How the European Single Currency Evolved ............................................. 559
  What Has Driven European Monetary Cooperation? ................................ 559
  The European Monetary System, 1979–1998 .......................................... 560
  German Monetary Dominance and the Credibility Theory of the EMS .......... 561
  Market Integration Initiatives ................................................................ 562
