## CONTENTS

| Preface  | XIII  | Research design from respondents' perspectives      | 60   |
|--|-------|---|------|
| Guided tour of the book                            | XX    | Research design classification                      | 62   |
| Publisher's acknowledgements                       | xxii  | Descriptive research                                | 65   |
| About the authors                                  | xxiii | Causal research                                     | 69   |
|  |       | Relationships between exploratory, descriptive and  |      |
| 1 Introduction to marketing research               | 1     | causal research                                     | 70   |
| Objectives   | 1     | Potential sources of error in research designs      | 74   |
| Overview   | 2     | International marketing research                    | 77   |
|  | 2     | Ethics in marketing research                        | 78   |
| What does marketing research encompass?            |       | •   |      |
| Definition of marketing research                   | 6     | Internet and computer applications                  | 79   |
| A classification of marketing research             | 7     | Summary   | 80   |
| The role of marketing research in MkIS and DSS     | 9     | Questions   | 80   |
| Marketing research suppliers and services          | 11    | Notes   | 81   |
| The marketing research process                     | 14    |   |      |
| The limitations of marketing research              | 19    | 4 Secondary data collection and analysis            | 83   |
| Supporting decision-makers in pan-European banking | 22    | Objectives  | 83   |
| International marketing research                   | 23    | Overview  | 84   |
| Ethics in marketing research                       | 24    | Defining primary data, secondary data and marketing | 0-   |
| Internet and computer applications                 | 25    |   | O.E. |
| Summary  | 26    | intelligence  | 85   |
| Questions  | 27    | Advantages and uses of secondary data               | 86   |
| Notes  | 27    | Disadvantages of secondary data                     | 87   |
|  |       | Criteria for evaluating secondary data              | 87   |
| 2 Defining the marketing research problem          |       | Classification of secondary data                    | 90   |
| and developing a research approach                 | 29    | Published external secondary sources                | 91   |
|  |       | Computerised databases                              | 94   |
| Objectives   | 29    | Syndicated sources of secondary data                | 96   |
| Overview   | 30    | Syndicated data from households                     | 98   |
| Importance of defining the problem                 | 31    | Syndicated data from institutions                   | 101  |
| The marketing research brief                       | 32    | International marketing research                    | 103  |
| The marketing research proposal                    | 35    | Ethics in marketing research                        | 104  |
| The process of defining the problem and developing |       | _   | 104  |
| a research approach                                | 37    | Internet and computer applications                  |      |
| Marketing decision problem and marketing           |       | Summary   | 106  |
| research problem                                   | 41    | Questions   | 106  |
| Defining the marketing research problem            | 43    | Notes   | 107  |
| Components of the research approach                | 44    |   |      |
| International marketing research                   | 49    | 5 Internal secondary data and the use               |      |
| Ethics in marketing research                       | 51    | of databases  | 108  |
| Internet and computer applications                 | 52    | Objectives  | 108  |
| Summary  | 53    | Overview  | 109  |
| Questions  | 54    | Internal secondary data                             | 109  |
| Notes  | 54    | Scanning devices                                    | 111  |
| TVOLCO   | 5-    | _   | 112  |
| 3 Pasaarch design                                  | 56    | Relating customer data to scanning systems          |      |
| 3 Research design                                  | 56    | Geodemographic data                                 | 114  |
| Objectives   | 56    | Linking different types of data                     | 117  |
| Overview   | 57    | Stages of development in using databases and        |      |
| Research design definition                         | 58    | survey data to build profiles of consumers and      |      |
| Research design from the decision-maker's          |       | model marketing decisions                           | 119  |
| perspective  | 59    | The datawarehouse                                   | 120  |
