# Contents

Introduction .....	1
<b>1 Models and Basic Concepts .....</b>	<b>7</b>
1.1 Temporal Constraints .....	7
1.1.1 Time-Feasible Schedules .....	7
1.1.2 Project Networks .....	9
1.1.3 Temporal Scheduling Computations .....	11
1.2 Renewable-Resource Constraints .....	16
1.2.1 Resource-Feasible Schedules .....	16
1.2.2 Forbidden Sets and Delaying Alternatives .....	19
1.2.3 Breaking up Forbidden Sets .....	21
1.2.4 Consistency Tests .....	23
1.3 Cumulative-Resource Constraints .....	28
1.3.1 Resource-Feasible Schedules .....	30
1.3.2 Forbidden Sets and Delaying Alternatives .....	32
1.3.3 Breaking up Forbidden Sets .....	35
1.3.4 Consistency Tests .....	36
<b>2 Relations, Schedules, and Objective Functions .....</b>	<b>39</b>
2.1 Resource Constraints and Feasible Relations .....	39
2.1.1 Renewable-Resource Constraints .....	40
2.1.2 Cumulative-Resource Constraints .....	46
2.2 A Classification of Schedules .....	52
2.2.1 Global and Local Extreme Points of the Feasible Region	52
2.2.2 Vertices of Relation Polytopes .....	53
2.3 Objective Functions .....	55
2.3.1 Regular and Convexifiable Objective Functions .....	56
2.3.2 Locally Regular and Locally Concave Objective Functions .....	60
2.3.3 Preorder-Decreasing Objective Functions .....	64

<b>3</b>	<b>Relaxation-Based Algorithms</b> .....	65
3.1	Regular Objective Functions .....	66
3.1.1	Enumeration Scheme .....	66
3.1.2	Solving the Relaxations .....	69
3.1.3	Branch-and-Bound .....	72
3.1.4	Additional Notes and References .....	76
3.2	Convexifiable Objective Functions .....	82
3.2.1	Enumeration Scheme .....	83
3.2.2	Solving the Relaxations: The Primal Approach .....	85
3.2.3	Solving the Relaxations: The Dual Approach .....	94
3.2.4	Branch-and-Bound .....	97
3.2.5	Additional Notes and References .....	99
<b>4</b>	<b>Constructive Algorithms</b> .....	107
4.1	Schedule-Generation Scheme .....	109
4.2	Local Search .....	115
4.3	Additional Notes and References .....	118
<b>5</b>	<b>Supplements</b> .....	123
5.1	Break Calendars .....	124
5.2	Sequence-Dependent Changeover Times .....	128
5.3	Alternative Execution Modes for Activities .....	131
5.4	Continuous Cumulative Resources .....	135
<b>6</b>	<b>Applications</b> .....	141
6.1	Make-to-Order Production Scheduling .....	142
6.2	Small-Batch Production Planning in Manufacturing Industries .....	147
6.3	Production Scheduling in the Process Industries .....	149
6.4	Evaluation of Investment Projects .....	155
6.5	Coping with Uncertainty .....	160
	<b>Conclusions</b> .....	165
	<b>References</b> .....	167
	<b>List of Symbols</b> .....	181
	<b>Index</b> .....	185
