*Preface: the reconfiguration of the world economy*  
xxv

### Part I  Conceptual frameworks and theories  
1 Global outsourcing and offshoring: in search of the optimal configuration for a company  
Farok. J. Contractor, Vikas Kumar, Sumit Kundu, and Torben Pedersen  
page 3

2 Globalization of R&D: offshoring innovative activity to emerging economies  
Ashok Bardhan and Dwight Jaffee  
48

3 A theory of the outsourcing firm  
Dave Luvison and Mike Bendixen  
73

### Part II  The offshoring and outsourcing of R&D and innovative activities  
4 Blurring firm R&D boundaries: integrating transaction costs and knowledge-based perspectives  
Andrea Martinez-Noya and Esteban Garcia-Canal  
107

5 Outsourcing, fragmentation, and integration: the pharmaceutical industry  
Janis K. Kapler and Kimberly A. Puhala  
137
6 Towards a better understanding of multinational enterprises’ R&D location choices 168
ANA COLOVIC

7 Does R&D offshoring displace or strengthen knowledge production at home? Evidence from OECD countries 191
LUCIA PISCITELLO AND GRAZIA D. SANTANGELO

8 Innovation across tech-firms’ boundaries: a knowledge-based view 210
SALMA ALGUEZAUI AND RAFFAELE FILIERI

9 Suitable organization forms for knowledge management at various R&D functions in decentralized and cooperative R&D networks 239
HSING HUNG CHEN

Part III Management issues in offshoring and virtual teamwork 265

10 Changing work practices: acceptance of virtual work among knowledge professionals engaged in offshoring activities 267
ELISA MATTARELLI AND MARIA RITA TAGLIAVENTI

11 Managing globally disaggregated teams: the role of organizational politics 297
SHAHZAD M. ANSARI, JATINDER S. SIDHU, HENK W. VOLBERDA, AND ILAN OSHRI

Part IV Empirical analyses and case studies of outsourcing and offshoring 325

12 Offshoring of high-value functions: a case study of US–India trade in medical transcription services 327
NIR KSHETRI AND NIKHILESH DHOLAKIA

13 Offshoring of IT and business, professional, and technical services: the recent experience of the United States 355
THOMAS J. NORMAN AND MAHMOOD A. ZAIDI

### Figures

1.1 The spatial and organizational choices available for each piece of the value chain  
1.2 The motivations for offshoring: lowering cost or the search for talent?  
2.1 Gross expenditures on R&D as a percentage of GDP  
2.2 R&D employment share in total employment in the US  
2.3 US R&D spending and incremental GDP due to productivity growth  
2.4 Size distribution of firms (by number of employees)  
2.5 Forms of outsourcing and offshoring  
2.6 Innovative dynamism  
2.7 Nature of activity outsourced/offshored  
2.8 Firm innovation diagnostics: example of constraints  
3.1 Outsourcing model as an inter-firm CoP (adapted from Scarso and Bolisani, 2008)  
3.2 The relationship of organizational expediency to complexity and risk over time  
4.1 A model of R&D governance decision trade-offs  
7.1 R&D offshoring (from OECD countries) by world region destination, 2003–2005  
8.1 The extended enterprise framework (adapted from Filieri and Alguezau, 2008)  
8.2 The new product development of the EE (adapted from Koen et al., 2001)  
9.1 The ANP hierarchical network of selection problem  
9.2 Suitable forms of organization for KM with regards to extended R&D matrix organization  
15.1 Three components of outsourcer–external service provider relationship
Tables

2.1 Mean size of firm, by attribute  
4.1 Contexts for governance choices for R&D services based on transactional characteristics  
4.2 Integrative framework of preferred modes of governance for R&D services based on transactional characteristics  
6.1 Surveys on R&D practices conducted on R&D practitioners  
6.2 Analysis of factors that determine R&D location choices  
6.3 The most important host-country/host-region factors for R&D location  
7.1 R&D offshoring from OECD countries to BRICKST  
7.2 Descriptive statistics and correlation coefficients  
7.3 Results of the econometric models (dependent variables: patents and patent shares)  
8.1 Toyota routines for suppliers’ network management  
9.1 Factors, eigenvalues, and cumulative variance in each dimension  
9.2 Characteristics function of the fuzzy numbers  
9.3 Linguistic value table  
9.4 The ranking with regards to different R&D functions ($\alpha = 0.8$ and $\beta = 0.2$)  
10.1 Characteristics of research sites and globally distributed teams  
10.2 Themes and categories  
12.1 A comparison of the medical transcription industry in India and the Philippines  
12.2a A comparison of manufacturing, medical transcription, and R&D industries in India and the US

List of tables

12.2b A comparison of cost of employing an MT and other selected occupations in India and the US 338
12.3 Phases of the medical transcription process and their factor substitution prospects 343
13.1 Trade in commercial services of the United States 357
13.2 Leading exporters and importers of other commercial services 358
13.3 Variable descriptions and sources 366
13.4 Trade partners included in dataset ranked by exports to the US 367
13.5 Descriptive statistics 368
13.6 Share of BPTS and IT exports to United States 1990 to 2005 – generalized least squares unbalanced panel estimation 370
13.7 Share of BPTS exports to United States – three time periods from 1990 to 2005 – generalized least squares unbalanced panel estimation 371
13.8 Share of IT exports to United States – three time periods from 1990 to 2005 – generalized least squares unbalanced panel estimation 372
14.1 Descriptive statistics for the dependent variables 384
14.2 Reported outsourcing levels of 34 HR activities – overall dataset organization reporting no outsourcing 386
14.3 Base model: control variables only (includes revenue) 2007 voluntary employee turnover (percent per year) clustered standard errors (44 states) 389
14.4 Base model: control variables only (omits revenue) 2007 voluntary employee turnover (percent per year) clustered standard errors (46 states) 390
14.5 Model 1a: zero HRO variable added (includes revenue) 2007 voluntary employee turnover (percent per year) clustered standard errors (44 states) 393
14.6 Model 1b: zero HRO variable added (omits revenue) 2007 voluntary employee turnover (percent per year) clustered standard errors (46 states) 394
14.7 Model 2: zero HRO (omits revenue) regressed on 2007 employee satisfaction scaled to percentage of maximum score 396
14.8 Model 3: zero HRO (omits revenue) regressed on 2007 customer satisfaction scaled to percentage of maximum score using robust standard errors 397
15.1 Outsourcing customer service 406
16.2 Chinese export of electromechanical domestic appliances with self-contained electric motor (code 7757-sitc 3): first 3 partners 416
16.3 Import of electromechanical domestic appliances with self-contained electric motor (code 7757-sitc 3): top 15 countries, 2007 418
16.4 Italian import of electromechanical domestic appliances with self-contained electric motor (code 7757-sitc 3): first 3 partners 419
16.5 List of CECED Italia members 422
16.6 Five case studies: product offering (1997–2002–2007) divided by area of production (Italy vs. foreign countries) 426
16.7 Five case studies: structure and vertical channel organization 427
16.9 Driving forces of offshoring 433
16.10 Outsourcing of primary activities (x = activity was fully outsourced; x (p) = activity was partially outsourced); location (“Italy” or “abroad”) indicates the location of external contract provider of outsourced activities 437
16.11 Outsourcing of support activities (x = activity was fully outsourced; x (p) = activity was partially outsourced); location (“Italy” or “abroad”) indicates the location of external contract provider of outsourced activities 439
Boxes

1.1 What is a high-value or core function?  
12.1 CBay’s Healthcare BPO venture
