Series preface

The events industry, including festivals, meetings, conferences, exhibitions, incentives, sports and a range of other events, is rapidly developing and makes a significant contribution to business and leisure related tourism. With increased regulation and the growth of government and corporate involvement in events, the environment has become much more complex. Event managers are now required to identify and service a wide range of stakeholders and to balance their needs and objectives. Though mainly operating at national levels, there has been significant growth of academic provision to meet the needs of events and related industries and the organizations that comprise them. The English speaking nations, together with key Northern European countries, have developed programmes of study leading to the award of diploma, undergraduate and postgraduate awards. These courses focus on providing education and training for future event professionals, and cover areas such as event planning and management, marketing, finance, human resource management and operations. Modules in events management are also included in many tourism, leisure, recreation and hospitality qualifications in universities and colleges.

The rapid growth of such courses has meant that there is a vast gap in the available literature on this topic for lecturers, students and professionals alike. To this end, the Elsevier Butterworth-Heinemann Events Management Series has been created to meet the need for a planned and targeted set of publications in this area.

Aimed at academic and management development in events management and related studies, the Events Management Series:

- provides a portfolio of titles which match management development needs through various stages;
- prioritizes publication of texts where there are current gaps in the market, or where current provision is unsatisfactory;
- develops a portfolio of both practical and stimulating texts;
- provides a basis for theoretical and research underpinning for programmes of study;
- is recognized as being of consistent high quality;
- will quickly become the series of first choice for both authors and users.
