Contents

	Preface	**13**
	Background	14
	Why Java and Groovy and Eclipse?	14
	Example Presentation	15
	Organisation of the Book	15
	Supporting Materials	15
	Acknowledgements	16
1	**A Challenge – Thinking Parallel**	**17**
1.1	Concurrency and Parallelism	17
1.2	Why Parallel?	18
1.3	A Multi-player Game Scenario	19
1.4	The Basic Concepts	26
1.5	Summary	29

2	**Producer Consumer: A Fundamental Design Pattern**	**30**
2.1	A Parallel Hello World	31
2.2	Hello Name	33
2.3	Processing Simple Streams of Data	34
2.4	Summary	37
2.5	Exercises	37
3	**Process Networks: Build It Like Lego**	**38**
3.1	Prefix Process	39
3.2	Successor Process	39
3.3	Parallel Copy	40
3.4	Generating a Sequence of Integers	41
3.5	Testing GNumbers	43
3.6	Creating a Running Sum	44
3.7	Generating the Fibonacci Sequence	48
3.8	Generating Squares of Numbers	54
3.9	Printing in Parallel	55
3.10	Summary	60
3.11	Exercises	60

4	**Parallel Processes: Non Deterministic Input**	**62**
4.1	Reset Numbers	63
4.2	Exercising ResetNumbers	66
4.3	Summary	69
4.4	Exercises	69
5	**Extending the Alternative: A Scaling Device and Queues**	**70**
5.1	The Scaling Device Definition	71
5.2	Managing A Circular Queue Using Alternative Pre-conditions	79
5.3	Summary	84
5.4	Exercises	84
6	**Testing Parallel Systems: First Steps**	**85**
6.1	Testing Hello World	85
6.2	Testing the Queue Process	87
6.3	The Queue Test Script	89
6.4	Summary	90
6.5	Exercises	90

SIMPLY CLEVER

ŠKODA

Do you like cars? Would you like to be a part of a successful brand?
We will appreciate and reward both your enthusiasm and talent.
Send us your CV. You will be surprised where it can take you.

Send us your CV on

7	**Deadlock: An Introduction**	**91**
7.1	Deadlocking Producer and Consumer	91
7.2	Multiple Network Servers	93
7.3	Summary	100
7.4	Exercises	100
8	**Client-Server: Deadlock Avoidance by Design**	**101**
8.1	Analysing the Queue Accessing System	101
8.2	Client and Server Design Patterns	103
8.3	Analysing the Crossed Servers Network	104
8.4	Deadlock Free Multi-Client and Servers Interactions	106
8.5	Summary	112
8.6	Exercises	113
9	**External Events: Handling Data Sources**	**114**
9.1	An Event Handling Design Pattern	115
9.2	Utilising the Event Handing Pattern	116
9.3	Analysing Performance Bounds	122

Download free eBooks at bookboon.com

Click on the ad to read more

9.4 Simple Demonstration of the Event Handling System 122
9.5 Processing Multiple Event Streams 127
9.6 Summary 130
9.7 Exercises 130

10 Deadlock Revisited: Circular Structures 132
10.1 A First Sensible Attempt 133
10.2 An Improvement 136
10.3 A Final Resolution 139
10.4 Summary 142

11 Graphical User Interfaces: Brownian Motion 143
11.1 Active AWT Widgets 143
11.2 The Particle System – Brownian Motion 144
11.3 Summary 162
11.4 Exercises 162

12	**Dining Philosophers: A Classic Problem**	**163**
12.1	Naïve Management	164
12.2	Proactive Management	169
12.3	A More Sophisticated Canteen	171
12.4	Summary	178
13	**Accessing Shared Resources: CREW**	**179**
13.1	CrewMap	180
13.2	The DataBase Process	182
13.3	The Read Clerk Process	184
13.4	The Write Clerk Process	185
13.5	The Read Process	186
13.6	The Write Process	187
13.7	Creating the System	187
13.8	Summary	190
13.9	Challenge	190
14	**Barriers and Buckets: Hand-Eye Co-ordination Test**	**191**
14.1	Barrier Manager	200
14.2	Target Controller	200
14.3	Target Manager	203
14.4	Target Flusher	204
14.5	Display Controller	206
14.6	Gallery	210
14.7	Mouse Buffer	212
14.8	Mouse Buffer Prompt	213
14.9	Target Process	213
14.10	Running the System	219
14.11	Summary	222
	Index	**223**
	Preface	**Part II**
	Organisation of the Book	Part II
	Supporting Materials	Part II
15	**Communication over Networks: Process Parallelism**	**Part II**
15.1	Network Nodes and Channel Numbers	Part II
15.2	Multiple Writers to One Reader	Part II

Download free eBooks at bookboon.com

15.3 A Single Writer Connected to Multiple Readers Part II
15.4 Networked Dining Philosophers Part II
15.5 Running the CREW Database in a Network Part II
15.6 Summary Part II

16 Dynamic Process Networks: A Print Server Part II
16.1 Print Spooler Data Objects Part II
16.2 The PrintUser Process Part II
16.3 The PrintSpooler Process Part II
16.4 Invoking The PrintSpooler Node Part II
16.5 Invoking A PrintUser Node Part II
16.6 Summary Part II

17 More Testing: Non-terminating Processes Part II
17.1 The Test-Network Part II
17.2 The Process Network Under Test Part II
17.3 Running The Test Part II
17.4 Summary Part II

18 Mobile Agents: Going for a Trip Part II
18.1 Mobile Agent Interface Part II
18.2 A First Parallel Agent System Part II
18.3 Running the Agent on a Network of Nodes Part II
18.4 Result Returning Agent Part II
18.5 An Agent with Forward and Back Channels Part II
18.6 Let's Go On A trip Part II
18.7 Summary Part II

19 Mobile Processes: Ubiquitous Access Part II
19.1 The Travellers' Meeting System Part II
19.2 The Service Architecture Part II

Download free eBooks at bookboon.com

19.3 Universal Client Part II
19.4 The Access Server Part II
19.5 Group Location Service Part II
19.6 Running the System Part II
19.7 Commentary Part II

20 Redirecting Channels: A Self-Monitoring Process Ring Part II
20.1 Architectural Overview Part II
20.2 The Receiver process Part II
20.3 The Prompter Process Part II
20.4 The Queue Process Part II
20.5 The State Manager Process Part II
20.6 The Stop Agent Part II
20.7 The Restart Agent Part II
20.8 The Ring Agent Element Process Part II
20.9 Running A Node Part II
20.10 Observing The System's Operation Part II
20.11 Summary Part II
20.12 Challenges Part II

21 Mobility: Process Discovery Part II
21.1 The Adaptive Agent Part II
21.2 The Node Process Part II
21.3 The Data Generator Process Part II
21.4 The Gatherer Process Part II
21.5 Definition of the Data Processing Processes Part II
21.6 Running the System Part II
21.7 Typical Output From the Gatherer Process Part II
21.8 Summary Part II
21.9 Challenge Part II

22 Automatic Class Loading – Process Farms Part II
22.1 Data Parallel Architectures Part II
22.2 Task Parallel Architectures Part II
22.3 Generic Architectures Part II
22.4 Architectural Implementation Part II
22.5 Summary Part II

Download free eBooks at bookboon.com

23	**Programming High Performance Clusters**	**Part II**
23.1	Architectural Overview	Part II
23.2	The Host and Node Scripts	Part II
23.3	An Application – Montecarlo Pi	Part II
23.4	Summary	Part II
24	**Big Data – Solution Scaling**	**Part II**
24.1	Concordance – A Typical Problem	Part II
24.2	Concordance Data Structures	Part II
24.3	The Algorithm	Part II
24.4	Analysis of Total Time Results	Part II
24.5	Analysis of Algorithm Phases	Part II
24.6	Dealing with Larger Data Sets	Part II
24.7	Implementation of the Scalable Architecture	Part II
24.8	Performance Analysis of the Distributed System	Part II
24.9	Summary	Part II
25	**Concluding Remarks**	**Part II**
25.1	The Initial Challenge – A Review	Part II
25.2	Final Thoughts	Part II
26	**References**	**Part II**
