### Section 1: Introduction

1—Managing in Today’s Libraries and Information Centers ................................. 3

- The Importance of Management ................................................. 4
- What Is Management? .............................................................. 6
- Who Are Managers? ................................................................. 6
- What Do Managers Do? .............................................................. 8
- Managerial Functions .............................................................. 8
- Managerial Roles ................................................................. 10
- What Resources Do Managers Use? .............................................. 12
- What Skills Are Needed by Today’s Managers? .............................. 13
- What Are the Differences in Managing in For-Profit and Not-for-Profit Organizations? ................................. 16
- Conclusion ................................................................. 17

2—The Evolution of Management Thought ................................................. 19

- Management in Ancient History .............................................. 20
- The Effects of the Industrial Age on Management .......................... 22
- Classical Perspectives .......................................................... 22
  - Scientific Management Movement ........................................... 23
  - Bureaucratic School ............................................................ 25
Contents

Administrative Principles .................................................. 26
The Humanistic Approach .................................................... 29
  Human Relations Movement ............................................. 29
  Self-Actualizing Movement .............................................. 30
The Quantitative Approach .................................................. 32
The Systems Approach ....................................................... 33
The Contingency Approach .................................................. 35
The Learning Organization ................................................... 35
Summary ................................................................. 36
Library and Information Center Management:
The Historical Perspective ................................................ 36
Conclusion ............................................................... 38

3—Change—The Innovative Process ................................. 41
  Factors Promoting Change .............................................. 41
  Empowerment—An Agent of Change .................................. 46
  Paradigm Shift—Myth or Reality ....................................... 48
  Organizing for Change .................................................. 50
  Diagnosing Change ...................................................... 52
  Libraries as Open Systems ............................................. 55
  Resistance to Change ................................................... 58
  Conclusion ............................................................... 60

Section 2: Planning

4—Planning Information Services and Systems ........... 65
  Techniques and Tools .................................................... 66
  Environment for Planning .............................................. 66
  Planning Models ........................................................ 67
  The Planning Process ................................................... 72
  Factors in Planning ..................................................... 73
    Time Frame .......................................................... 73
    Collecting and Analyzing Data ..................................... 74
  Levels of Planning ..................................................... 75
    Flexibility ............................................................. 75
    Accountability ........................................................ 75
  Environmental Assessment ............................................. 76
    Developing Standards and Guidelines ......................... 76
    Forecasting ............................................................ 76
  Theory Applications ..................................................... 78
    Management by Objectives (MBO) ................................. 78
    Total Quality Management (TQM) ................................. 80
  Policy Making .......................................................... 81
    Sources of Policy .................................................... 83
    Effective Policy Development ....................................... 84
    Implementing Policy ................................................ 85
  Decision Making ........................................................ 86
    Steps in Making Decisions ......................................... 87
### Section 3: Organizing

#### 7—Organizations and Organizational Culture

- Organizing .................................................. 132
- What an Organization Is ................................. 133
- Organizational Structure ................................. 136
- Getting Started with Organizing ....................... 139
- Formal and Informal Organizations .................... 142
- Libraries as Organizations ............................... 143
- Organization Charts ......................................... 143
- Organizational Culture ..................................... 147
- Getting to Know the Culture .............................. 151
- Conclusion .................................................. 153

#### 8—Structuring the Organization—Specialization and Coordination

- Specialization .............................................. 156
- Parts of an Organization .................................. 158
- Methods of Departmentalization ......................... 159
  - Function ......................................................... 157
  - Territory ......................................................... 159
  - Product ......................................................... 161
Contents

Customer .................................................. 162
Process ..................................................... 163
Subject ..................................................... 164
Form of Resources ........................................ 165
Summary .................................................. 165
The Hierarchy ............................................. 165
The Scalar Principle ...................................... 167
Power and Authority ..................................... 168
Delegation ................................................ 169
Centralization and Decentralization ..................... 170
Unity of Command ....................................... 172
Span of Control .......................................... 172
Line and Staff Positions ................................ 174
Coordination ............................................ 176
Coordinating Mechanisms ............................... 177
Conclusion ............................................... 177

9—The Structure of Organizations—Today and in the Future ...................................................... 181

Bureaucracies ............................................. 182
Mechanistic Organizations ............................... 185
Organic Systems .......................................... 185
Modifying Library Bureaucracy ......................... 187
Some Commonly Used Modifications .................... 189
Committees ............................................... 189
Task Force ............................................... 189
Matrix Organizational Structure ....................... 189
Teams .................................................... 192

Reshaping the Library’s Organizational Structure ............................. 193
The Library Organization of the Future ................... 197
Conclusion ............................................... 201

Section 4: Human Resources

10—Staffing the Library .................................... 207

The Increasing Complexity of Human Resources Management ............................................. 209
Types of Staff ............................................. 210
The LIS Education and Human Resource Utilization Policy ............................................. 213
The Organizational Framework for Staffing ................................................................. 216
Job Descriptions .......................................... 219
Job Analysis .............................................. 220
Job Evaluation ........................................... 222
Recruitment and Hiring .................................. 224
Filling Vacant Positions .................................. 225
Attracting a Diverse Workforce ......................... 226
Internal and External Applicants ....................... 227
## Contents

- Matching the Applicant to the Position ........................................... 228
- The Selection Process ................................................................. 229
- Interviewing the Candidate ........................................................... 229
- Background Verification ................................................................. 231
- Making the Hiring Decision ............................................................ 232
- Conclusion ......................................................................................... 233

### 11—The Human Resources Functions in the Library .............................. 235

- Training and Staff Development ......................................................... 236
  - Orientation ...................................................................................... 236
  - Initial Job Training ........................................................................ 237
- Training and Staff Development for Established Employees ............... 240
- Performance Appraisals ................................................................. 241
  - Why Appraisals Are Done .............................................................. 242
  - When to Do Appraisals ................................................................ 243
  - Who Does the Appraisals? ............................................................. 244
  - Problems in Rating ....................................................................... 246
- Methods of Performance Appraisal .................................................. 246
- The Performance Appraisal Review Process ..................................... 251
- The Performance Appraisal Interview .............................................. 252
- Discipline and Grievances ............................................................... 254
  - Firing or Termination .................................................................... 256
  - Grievance Systems ....................................................................... 256
- Employee Compensation ................................................................. 257
  - Determination of Salary ............................................................... 258
  - Development of a Salary Scale ..................................................... 259
  - Salary Increases ........................................................................... 260
  - Recognition and Rewards ............................................................. 261
  - Employee Benefits ........................................................................ 262
- Conclusion ......................................................................................... 265

### 12—Other Issues in Human Resource Management .............................. 267

- Human Resources Policies and Procedures ....................................... 268
- Career Development .......................................................................... 269
  - Plateauing ...................................................................................... 272
  - Mentoring ....................................................................................... 274
- Health and Safety Issues in the Library ............................................ 275
  - Physical Stress ............................................................................... 276
  - Job-Related Mental Stress .............................................................. 276
  - Burnout .......................................................................................... 279
  - Violence and Crime in the Workplace ......................................... 280
- External Impacts on Human Resources—Legal Protections ............... 282
  - Equal Employment Opportunities ................................................ 283
  - The Civil Rights Act of 1964 and Other Important Federal Legislation 284
  - Affirmative Action and Comparable Worth .................................... 285
Section 5: Leading

13—Motivation .................................................. 299
   The Human Element of the Organization .............. 300
   Structuring the Human Element in Organizations . . 302
   Motivation ................................................. 303
   The Content Models ...................................... 305
      Maslow’s Hierarchy of Needs ......................... 305
      Herzberg’s Two-Factor Theory of Motivation ...... 307
      McClelland’s Need Theory ........................... 310
   The Process Models ...................................... 311
      Adams’s Equity Theory ................................. 311
      Vroom’s Expectancy Theory ......................... 312
      Behavior Modification ............................... 314
      Goal-Setting Theory ................................. 315
   How Should Managers Motivate? ....................... 316
   Conclusion .............................................. 319

14—Leadership ................................................ 321
   What Is Leadership? ..................................... 322
   Managers and Leaders .................................. 322
   Leadership Qualities .................................. 323
      Exercising Power ..................................... 323
      Presenting a Vision .................................. 325
   The Trait Approach to the Study of Leadership .... 326
   Behavioral Approaches to the Study of Leadership . 327
      The University of Iowa Studies .................... 328
      Ohio State Studies ................................... 328
      University of Michigan Studies ..................... 328
   Styles of Leadership .................................... 329
      Likert’s Systems of Management .................... 329
      The Leadership Grid .................................. 330
      Transformational/Transactional Leadership ...... 332
   Situational or Contingency Models of Leadership ... 332
      Fiedler’s Leadership Contingency Model .......... 333
      Path-Goal Theory of Leadership ..................... 333
   Leadership in the Twenty-First Century ............. 337
   The Leadership Challenge .............................. 338
   Developing Leadership ................................. 340

15—Ethics ....................................................... 346
   Ethics in Modern Organizations ....................... 347
   Ethics—A Definition .................................... 347
Section 6: Coordinating

18—Measuring, Evaluating, and Coordinating Organizational Performance ......................... 409

Measuring and Evaluating ......................... 410

Performance Indicators ......................... 412

Coordinating and Controlling ......................... 413

Requirements for Control ......................... 413

Techniques for Evaluating Activities ................. 416

Developing Standards ......................... 416

Measuring Performance ......................... 416

Correcting Deviations ......................... 418

Evaluating Efforts ......................... 419

Tools of Coordination ......................... 421

Cost-Benefit Analysis ......................... 421

Benchmarking ......................... 423

Program Evaluation and Review

Techniques (PERT) ......................... 424

Balanced Scorecard ......................... 426

LibQUAL+ ......................... 427

Management Information Systems (MIS) ......................... 428

Decision Support Systems (DSS) ......................... 429

Time-and-Motion Studies ......................... 429

Operations Research ......................... 430

Knowledge Management ......................... 431

Monitoring Programs for Results and

Accountability ......................... 432

Monitoring ......................... 432

Accountability ......................... 433

Conclusion ......................... 434

19—Fiscal Responsibility and Control ......................... 437

Budgets—Planning and Evaluation Tools ......................... 438

The Funding Process ......................... 440

Fund-Raising Efforts ......................... 441

The Budgeting Process ......................... 442

Budgeting Techniques ......................... 443

Line-Item Budgeting ......................... 444

Formula Budgeting ......................... 447

Program Budgeting ......................... 448

Performance Budgeting ......................... 448

Planning, Programming, and

Budgeting System (PPBS) ......................... 450

Zero-Based Budgeting (ZBB) ......................... 452

 Techniques for Financial Allocation ......................... 455

Entrepreneurial Budgeting ......................... 455

Allocation Decision Accountability

Performance (ADAP) ......................... 456
